Question: Does BAND-IT offer any colored band to match the color of a decorative pole?

Answer:

Yes! Color matched clamps and mounting hardware from BAND-IT provide the professional "finishing touch" for a well done project. The decoative coated band is frequently specified for its durable, baked on coating designed to match decorative light poles or existing hardware on Municipal pole projects.

The decorative coating is available in the Ultra-Lok Free End Clamp System. These clamps are designed to be installed with our UL4000 power tool providing a faster, tighter, stronger, consistent clamp to withstand heavy wind loads and still look great.

In addition to our Ultra-Lok Systems consider the BAND-IT Free End bands, supplied with our baked, Polyester Powder coating, which is UV fade and chip resistant.

Although BAND-IT offers a Type 316 SS band with a PPA 571 coating, this is not recommended for this application. See FAQ 110 "Why does BAND-IT offer coated cable ties and band?" for more information.

Hints and Help:

•Ultra-Lok Free End clamp systems are 12.7 mm or 19.05 mm wide, 0.762 mm thick, and ¼ hard Type 201 SS.
•Free End band products are typically 19.05 mm wide, 0.762 mm thick, and Type 201 SS. These Free Ends are available in customer specific lengths and can be single or double wrapped for added strength.
•Decorative coated Free End Clamp orders can typically be filled in 3 weeks. In order to process your order, we'll need the following information:

1. Consider the minimum order quantity of 150 units when confirming material requirements - length, width, thickness, material type– consider double wrap or single wrap band lengths.
2. Standard Free End buckles are included.
3. Ultra-Lok Decorative coated Free Ends require Ultra-Lok buckles ordered separately.
4. Color specification and gloss level by color number or sample.
5. Special packaging requirements.

Call our special order department for a price and delivery time.
