BAND-IT®

PPA Coated BAND-FAST™

BAND-FAST™

CABLE RESTRAINT CLAMPS

The low cost alternative to cable cleats

Introducing the PPA Coated BAND-FAST™ Clamp with captive clip from BAND-IT®

PRODUCT BENEFITS

- Low profile finish
- 316 grade stainless (0.4mm band thickness)
- PPA 571 coating (0.4mm coating thickness)
- Zero Halogen, low smoke & fume
- DNV and GL Type Approved Materials
- Logistical and handling benefits (easier to move around site in bulk)
- Standard width 5/8” (15.88mm) – other widths available
- Standard colour black (other colours available upon request)
- Captive sealing clip
- Fully rounded edges
- Round profile on end of band
- Improved health & safety during installation
- Significantly lower cost compared to cleats
- Significant weight reduction
- Reduced inventory – one size fits all
- No accessories required (fixing, liners, packers, studding, etc)
- Accommodates variations in cable diameter
- Reduced environmental impact during manufacture / transportation / decommissioning
- 50% labour saving versus cleats
- Independently tested for shock and short circuit

Case Study

PPA Coated BAND-FAST™

Aker H-6e Drilling Rigs

Project: Aker H-6e Drilling Rigs

Product: PPA Coated BAND-FAST™ Clamps

Application: Alternative to Cable Cleats

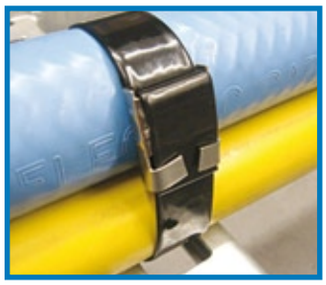

Reason: Lower cost, low profile, reduce weight, faster installation, Health & Safety advantages.

Testing was undertaken at SINTEF (Trondheim University – Norway) in conjunction with Aker Solutions to evaluate suitability of 5/8" wide PPA Coated BAND-FAST™ Clamps as an alternative to Cable Cleats under short circuit conditions. The product exceeded Aker Solutions' expectations and was used throughout the project.

The product exceeded Aker Solutions' expectations and over 40,000 clamps were used throughout the project.

AKER Solutions later reported:

- Over 50% combined savings in material and labour costs compared to cleats
- Logistical advantages due to lower weight of product and ease of handling
- Reduced inventory due to 'one size fits all'
- BAND-FAST™ Clamps easily accommodated any size variation due to cable diameter tolerances
- Reduced Health & Safety risks during installation (heavy cleats / bolts, etc / dropped from height / carrying heavy cleats & accessories to work area)
- Aker further reduced drop risk by securing the tool to the operator via a wrist strap
- Lower profile of finished cable runs leading to space savings
- Reduced weight of materials on rig leads to increased production capability
- Reduced risk of damage to cable insulation during cable pulling
