BAND-IT®

ENGINEERED FASTENING SOLUTIONS

THE DRILL ACCESSORY BANDING TOOL

Power up your installs with any 18v drill for ultimate convenience!

Manual banding tools can be slow, inconsistent, and physically demanding, leading to wasted time and resources. These inefficencies can hinder installer productivity and affect your bottom line.

Our innovative banding tool, compatible with any 18v drill, offers a solution for faster, stronger, and more reliable installations. No more manual winding - harness the power you already carry with you!

Add to your bag of tools today with BAND-IT's Drill Accessory Banding Tool.

C001DA
Drill Accessory Banding Tool

Why use it?

- **Faster Installation:** No more manual winding, harness the power you already have for quick installs
- **Use Existing Tools:** Compatible with standard 18V drills
- **Stronger Hold:** On average, up to 33% tighter installs compared to manual tool for more consistent and tighter installations, reducing the risk of loose bands
- **Eliminate the Guess Work:** Utilize drill torque settings* to achieve consistent tension every install
- **Easier to Use:** No need to rollover entire tool or reduce tension during rollover, minimizing training time for new users. Gripper open lever leaves hands free to work
- **Protects Your Installation:** Nose-only rollover geometry reduces risk of cracked bands, ensuring integrity of installation

Contact your BAND-IT representative for more information.
